VINITKUMAR PRAJAPATI

AI Product Manager | Product Manager | Analyst

vinitoza1702@gmail.com | +91-98984-71702 | Ahmedabad, Gujarat, India

https://www.linkedin.com/in/vinitkumar-prajapati/ | https://vinit-oza.github.io/Portfolio/

PROFESSIONAL SUMMARY

Aspiring AI Product Manager with a B.Tech in CSE (Big Data Analytics), hands-on experience in AI/ML data pipelines, and certifications from IBM and Microsoft. Skilled in product roadmap thinking, Agile methodologies, stakeholder management, KPI tracking, and data-driven decision making. Proven ability to manage cross-functional collaboration, define MVPs, prioritize product backlogs, and translate technical findings into actionable business insights.

CORE SKILLS & COMPETENCIES

Product Management: Product Roadmap, PRD, MVP, Backlog Prioritization, GTM Strategy, User Research, VoC, Competitive Analysis, KPI/OKR, A/B Testing, Release Planning

Agile & Methodology: Scrum, Sprint Planning, Sprint Review, MoSCoW, RICE, Acceptance Criteria, Iterative Development, Continuous Feedback Loops

AI / ML Domain: Data Annotation, ML Model Evaluation, Data Pipeline, Feature Engineering, Bias Mitigation, Precision/Recall/F1-Score, ROC-AUC, NLP, Computer Vision, Generative AI, MLOps

Data & Tools: Python (Pandas), SQL, Power BI, Tableau, Excel, CVAT, Roboflow, GitHub, Jupyter Notebooks, Kaggle

PROFESSIONAL EXPERIENCE

AI Data Quality & Annotation Specialist • **Pixel Annotation** • *Ahmedabad* • *01/2026 – Present*

- Managed AI/ML training data quality roadmap for 50,000+ structured and unstructured data points at 98%+ accuracy, directly improving downstream model precision, recall, and F1-score KPIs.
- Led cross-functional sprint-style reviews with labeling teams and ML engineers, resolving 200+ edge-case annotation issues and establishing acceptance criteria that reduced data ambiguity by ~30%.
- Optimized CVAT and Roboflow annotation workflows using prioritization frameworks, reducing rework cycles by ~25% and improving team throughput — core AI Product Manager responsibilities in data pipeline management.

Data Analyst Intern • **Codec Technologies India** • *Remote* • *10/2025 – 12/2025*

- Performed requirements gathering with stakeholders and executed end-to-end data wrangling (Python, SQL, Excel) on 1,000+ rows, delivering clean datasets that enabled data-driven decision making for internal reporting.
- Built interactive Power BI and Tableau dashboards integrating multiple data sources, reducing manual reporting turnaround by ~40% and enabling self-service analytics for cross-functional teams.
- Conducted EDA and surfaced KPI trends for stakeholder presentations, simulating core Product Manager activities of discovery, prioritization, and iterative delivery.

PROJECTS — PM CASE STUDIES

1. Airbnb Product Case Study | AI Product Management

- Analyzed Airbnb growth from startup to $100B+ marketplace using product management frameworks and hypothesis-driven development.
- Identified key friction points (trust, payment, photo quality) and mapped product solutions that improved booking conversion by 2–3x.
- Studied implementation of AI-driven features like Smart Pricing, personalized search ranking, and fraud detection to enhance user experience
- Evaluated two-sided marketplace dynamics, trust infrastructure, and their impact on user retention (>50% repeat bookings).
- Derived insights on sequencing product development: human validation → scalable systems → AI optimization.

2. Uber Eats Product Strategy Case Study | AI & Marketplace Optimization

- Analyzed Uber Eats market position vs DoorDash, identifying key gaps in delivery speed, driver trust, and ecosystem leverage.
- Proposed "Driver Fairness Shield" to improve driver retention by addressing tip-baiting and earnings transparency using AI-based prediction models.
- Designed "Perfect Timing Engine" using predictive analytics to optimize dispatch timing and reduce delivery time from ~38 to ~30 minutes.
- Developed "One App for Everything" strategy leveraging Uber's ecosystem to increase cross-platform engagement and customer lifetime value.
- Estimated $10B+ annual revenue impact through improved retention, faster delivery, and subscription-based growth strategies.

CERTIFICATIONS

Extract, Transform & Load Data in Power BI
Microsoft | 2025

Generative AI for Data Analysts
IBM | 2025

Database & SQL for Data Science with Python
IBM | 2025

EDUCATION

B.Tech — Computer Science Engineering **(Big Data Analytics)**

- *Parul University PIET, Vadodara, Gujarat* • *2022 – 2026*
