PROFESSIONAL SUMMARY

Business Analyst and AI Product Manager with 6+ months of client-facing experience spanning requirements gathering, annotation team management, business analysis, BRD/FRD/SRS authorship, and project management for AI/ML and e-commerce platforms. Proven communicator across technical and non-technical stakeholders — managing client expectations, translating business needs into delivery-ready specifications, and reporting KPIs at the executive level. Proficient in Jira, Confluence, Figma, Power BI, and Agile delivery from 0-to-1. B.Tech CSE (Big Data Analytics); certified by Microsoft, Google, and IBM.

CORE COMPETENCIES

- Business Analysis & Stakeholder Management:** Requirements gathering, BRD/FRD/SRS authoring, user stories, stakeholder elicitation, UAT, SDLC, process mapping, client communication, change management, requirements traceability, NPS, VoC, customer segmentation
- Product Management & Delivery:** Product roadmap, PRDs, OKRs, North Star metrics, KPIs, RICE/MoSCoW, MVP, backlog prioritization, sprint planning, 0-to-1 delivery, product lifecycle, feature flags, canary deployments, release management, GTM, Jira, Confluence, Figma
- Data, BI & Analytics:** SQL, Python (Pandas), Power BI, Tableau, Looker, BigQuery, A/B experimentation, cohort & funnel analysis, behavioral analytics, usage telemetry, retention analysis, product analytics, data modeling, ETL, Mixpanel, Amplitude, data governance
- AI / ML & Computer Vision:** Computer Vision, YOLOv8, LiDAR point cloud processing, 3D keypoint extraction, CVAT, Roboflow, NLP, GenAI, LLMs (Gemini, GPT-4o), RAG architecture, vector embeddings, hybrid retrieval, RAGAS evaluation, MLOps, Vertex AI

PROFESSIONAL EXPERIENCE

Pixel Annotation | Ahmedabad, Gujarat, India

Jan 2026 – Present

Associate Project Consultant — AI & Data Products

- Client Communication & Stakeholder Management :** Served as the primary client-facing liaison for active AI projects — conducted weekly progress calls, delivered structured status reports, managed scope clarification and change requests, and facilitated requirement walkthroughs between clients, domain experts, and internal delivery teams; maintained $\pm 5\%$ schedule variance across concurrent project timelines.
- Requirements Gathering & BA Documentation :** Led structured elicitation sessions with clients to capture AI data specifications; translated business and domain requirements into detailed annotation schemas, data taxonomies, labeling guidelines, quality acceptance criteria, and Confluence-documented BRDs; managed Jira sprint backlogs and authored user stories aligned to project delivery milestones.
- Annotation Team Management & Sprint Coordination :** Planned and supervised day-to-day operations of the annotation team across concurrent AI projects; ran sprint planning and review ceremonies, assigned workloads via Jira, resolved annotation edge cases and inter-annotator disagreements, and enforced quality thresholds — maintaining team throughput and on-time delivery against client SLAs.
- AI Smart City Project — Technical Delivery :** Coordinating a multi-stage computer vision pipeline for urban intelligence: (1) Pre-processing raw LiDAR point cloud and RGB camera sensor streams; (2) Structured multi-modal annotation via CVAT — designing object classes, bounding volumes, and semantic segmentation schemas for road infrastructure, vehicles, and pedestrians; (3) 3D semantic keypoint extraction for urban scene topology and structural landmark mapping; (4) Model training coordination with YOLOv8 and transformer-based architectures for real-time object detection and urban scene classification; (5) Evaluation framework tracking mAP@50, Precision, Recall, and F1-score KPIs across iterative training cycles.

PROJECTS

RAG-Powered Enterprise Knowledge Assistant · AI Product + Engineering

- Designed and launched a RAG-powered Project Knowledge Assistant that indexed 1,200+ project artifacts, enabling natural language search across meeting notes, sprint reports, and risk logs, reducing information retrieval time by **65%** and improving stakeholder self-service adoption by **40%**.

PRODUCT CASE STUDIES

Project Horizon — ShopSphere E-Commerce Platform · [BRD](#) · [FRD](#) · [SRS](#) · [Associate PM](#) · [GitHub ↗](#)

- Authored complete BA documentation suite for ShopSphere — a B2C multi-category e-commerce marketplace (React web, iOS/Android, microservices backend with Node.js/Python, PostgreSQL, Elasticsearch/Redis; integrations: Razorpay, Shiprocket): 7 artefacts including PMP, SRS, FRD (25+ pages) with process flows, business rules, and 90%+ requirements traceability across 8 modules; 8 interactive wireframes in HTML; risk register, RACI, and Jira sprint plan for a 12–15 FTE team. Outcome KPIs: conversion +20%, cart abandonment –15 pts, fulfilment –25%, 99.9% uptime SLA, P95 load ≤ 2.5 s — ₹4.05 Cr Agile delivery within $\pm 5\%$ tolerance.

Airbnb Product Strategy · **Uber Eats AI Optimisation** · AI Product Management

- Airbnb:** Mapped AI solutions (Smart Pricing, personalised ranking, fraud detection) improving booking conversion 2–3x; product sequencing insight: human validation $\rightarrow$ scalable systems $\rightarrow$ AI optimisation.
- Uber Eats:** 'Driver Fairness Shield' (AI earnings prediction) + 'Perfect Timing Engine' (dispatch $\sim 38 \rightarrow \sim 30$ min); 'One App' CLV strategy — \$10B+ revenue impact modelled via cohort and retention analysis.

CERTIFICATIONS

- Microsoft AI Product Manager Professional Certificate** (2026)
- Agile Project Management — Google** (2025)
- Generative AI for Data Analytics — IBM** (2025)
- Data Analytics Professional Certificate — IBM** (2025)
- Database & SQL for Data Science — IBM** (2025)

EDUCATION

B.Tech — Computer Science Engineering (Big Data Analytics)

Parul University PIET, Vadodara, Gujarat | Machine Learning, NLP, Big Data, Data Mining
